

INSPECTION SPYBALL CONTROL UNIT

Model SCPI-B With NEW Submertec DVR

Weighing only 11 Kg and housed in a durable yellow Polypropylene case, This unit provides the ultimate in portable controllers for the SB-CI Inspection Spyball.

- 15 inch Sunlight Viewable Colour LCD Display
- Digital Video Recorder—SSD, CF & USB
- Record Still Photos during record or playback
- Video Text overlay using USB Keyboard
- Store unlimited pages of text for overlay
- Date and Time overlay
- Audio input for Microphone
- Built in audio playback speaker.
- Composite video output
- Joystick for proportional control of camera angle
- Weatherproof when closed.

The 15 inch colour display mounted in the case lid behind a scratch resistant Polycarbonate window displays a clear and bright image from the Spyball camera even in bright sunlight.

Panel facias are durable, wipe clean Polycarbonate membranes with control buttons and indicators clearly marked and logically grouped for ease of operation.

A new Digital Video Recorder developed by Submertec saves up to 100 hours of best quality video and still photo files to the built in Solid State Drive with simultaneous export to Compact Flash or USB memory. (up to 700 hours at lower quality)

Menu controls are provided for playback, export from SSD, delete, file name, file number, record quality, date / time format etc.

The DVR and Text menu system can be displayed in English or French with other languages added as an option.

Spyball control now includes variable intensity LED lighting.
